

MUH. YASSAR NURFAJRI DHARMAWAN

FULLSTACK DEVELOPER | DATA ANALYST

muhyassarnurfajrid@gmail.com | +62812-4309-1182 | [linkedin.com/in/muhyassarnd/](https://www.linkedin.com/in/muhyassarnd/) | muh-yassar-portfolio.vercel.app/id

SUMMARY

Informatics graduate with hands-on experience in full-stack web development, data processing, database management, and analytical projects. Skilled in Laravel, PHP, MySQL, Python, SQL, Excel, and Power BI to develop web applications, manage structured data, and transform data into meaningful insights. Experienced in building functional systems, integrating databases, validating data, and supporting data-driven decision-making. Strong in analytical thinking, problem-solving, software testing, and collaboration, with a strong interest in Full-Stack Development and Data Analytics.

EXPERIENCE

IT Staff | Dinas Pemberdayaan Perempuan dan Perlindungan Anak serta Pengendalian Penduduk dan Keluarga Berencana Apr 2025 - Jun 2026

Surabaya, Indonesia

- Provided technical support, troubleshooting, and maintenance for 30 users, helping minimize work disruptions and maintain smooth daily IT operations.
- Maintained and configured 20 computers and IT devices, improving device reliability and reducing recurring technical issues.
- Supported system updates and IT implementation activities, helping ensure systems remained stable, secure, and ready for daily operational use.

Full Stack Developer (Remote) | PT. Winnicode Garuda Teknologi

Feb 2025 - Jul 2025

Bandung, Indonesia

- Developed and maintained a Laravel/PHP/MySQL employee attendance system supporting 50 employees, enabling digital clock-in/clock-out, attendance tracking, and automated daily attendance records.
- Implemented authentication, database integration, reporting, and data-management features to manage hundreds of attendance records, reducing reliance on manual attendance processing and improving data accessibility.
- Collaborated across requirements analysis, development, testing, and implementation, identifying and resolving functional issues before deployment to improve application reliability and ensure smoother system usage.

Android Mobile Development & UI/UX Design | Infinite Learning

6 Sep 2024 - Des 2024

Batam, Indonesia

- Applied Android application development using Kotlin and Jetpack Compose, including UI implementation, navigation, and basic application functionality.
- Designed mobile application interfaces using Figma, producing 5 wireframes, 3 interactive prototypes, and 3 high-fidelity designs as part of the UI/UX design process.
- Conducted 10 usability testing sessions and performed 3 design iterations based on user feedback to improve navigation, layout, and overall usability.
- Applied project management principles in planning tasks, coordinating project activities, tracking development progress, and supporting collaboration throughout the design and development process.

EDUCATION

Bachelor of Informatics - GPA 3.81/4.00 | UPN "Veteran" Jawa Timur

Sep 2022 - Jul 2026

Surabaya, Indonesia

Thesis : Classification Of Chronic Lymphocytic Leukemia Using The Swin Transformer

- Developed a Swin Transformer-based image classification model using 10,216 microscopic white blood cell images to distinguish between Normal and Chronic Lymphocytic Leukemia (CLL) cells.
- Achieved 91.29% test accuracy, 94.18% precision, 92.96% recall, 93.56% F1-score for CLL detection, and 95.74% ROC-AUC, correctly classifying 933 of 1,022 test images.
- Applied Grid Search hyperparameter tuning and class weighting to improve model performance and address class imbalance between 6,955 CLL and 3,261 Normal images.
- Integrated the trained model into a Streamlit web application for real-time image upload and prediction, demonstrating its potential as an AI-assisted tool for preliminary hematology image classification

CERTIFICATIONS & TRAINING

Junior Web Programmer - Badan Nasional Sertifikasi Profesi (BNSP)

2026

English Proficiency Test - Pusat Bahasa UPN "Veteran" Jawa Timur

2026

Microsoft Office for Office Staff - Skill Academy by Ruangguru

2024

Mini Bootcamp - Web Development - Edspert.id

2024

SELECTED PROJECTS

Pawnshop Transaction Data Analysis Dashboard

August 2026

- Analyzed 200 pawnshop transactions across 5 branches and 5 collateral categories, covering approximately Rp1.97B in total loans from Rp2.71B in appraised collateral value.
- Built automated Excel calculations using INDEX-MATCH, IF, COUNTIF, SUMIF, AVERAGEIF, and RANK to evaluate interest rates, repayment status, loan categories, and branch performance.
- Created PivotTables and an interactive dashboard to monitor key KPIs, including total loans, estimated interest, repayment status, collateral categories, and branch performance.
- Identified 104 paid and 96 outstanding transactions and ranked branch performance, with Makassar contributing approximately Rp511.47M in total loans.

Employee Attendance System

July 2025

- Developed a web-based attendance system supporting 50 employees, centralizing authentication, clock-in/clock-out, attendance tracking, and daily attendance summaries in a single platform.
- Designed and managed a MySQL database containing hundreds of attendance records, enabling structured storage and easier retrieval of employee attendance data.
- Automated daily attendance recording and reporting, reducing reliance on manual record-keeping and improving data consistency and monitoring efficiency.
- Performed system testing, validation, and maintenance to ensure reliable attendance processing and improve the accuracy of employee records.

WiserrApp for Swiftlet Farming

September 2024

- Developed an Android application using Kotlin and Jetpack Compose with 7 key feature areas covering environmental monitoring, maintenance scheduling, production tracking, AI assistance, consultation, community, and education.
- Integrated a Dialogflow AI chatbot capable of handling approximately 80% of common inquiries and implemented WebRTC-based real-time consultation with experts.
- Built 3 types of interactive educational content—videos, articles, and quizzes—and integrated Firebase for application data, notifications, and automated reminders.
- Centralized monitoring, production tracking, and maintenance scheduling, contributing to an estimated 30% improvement in farming-management efficiency.

SKILLS AND LANGUAGES

Technical Skills

Laravel, PHP, JavaScript, HTML, CSS, REST API, API Integration, Kotlin, Jetpack Compose, Python, Pandas, SQL, Data Cleaning, Data Validation, Data Preprocessing, Data Visualization, Statistical Analysis, Machine Learning, Deep Learning, Image Classification, UI/UX Design

Tools

Git, GitHub, Postman, Microsoft Excel, Figma, Adobe XD, PyTorch, MySQL, Figma

Core Competencies

Problem Solving, Analytical Thinking, System Analysis, Software Testing & Debugging, Team Collaboration, Communication, Adaptability, Attention to Detail

Languages

Indonesia (Native Proficiency) | English (Fluent)
